
Vitæ Consultancy and Support Services

Business planning? ...you're in control with the Vitæ team.

From one user to 50,000+, single or worldwide multi-branch, real-time or replicating operations, web or WAN delivery, virtual branch, mobile or homeworking, own it, rent it, outsource the equipment, outsource the service, (no IT dept or equipment), acquisitions from one week to 5 years... Whatever your business strategy, whatever constraints local infrastructure limitations may impose, Vitæ empowers you to organise your business the way you need it.

But in selecting Vitæ, you have chosen not only the leading product set in the staffing world, but have also picked a partner as committed to your success as you are yourself.

So whether your aim is to:-

- a) dispense with the need for an IT department altogether in favour of a guaranteed level of outsourced service
or
- b) develop and integrate your own IT infrastructure and applications to achieve the best results

or anything in between, the Vitæ team stand ready to fully support your aims, your planning, your implementation, and day to day operations..

How? By providing and supporting all the planning, strategy, and payment options you may choose, by offering solutions to all the problems you may face, (whether high-risk start-up or established worldwide enterprise), and by providing, on a flexible basis, all the product, application-delivery, systems integration, financial and support services such plans may require to deliver you bottom-line results rapidly.

We understand that your markets and business environments quickly change, (sometimes more rapidly than any of us would like), and that the successful business must quickly adapt and react. So whatever application-delivery, service-supply, or payment strategy you may initially adopt, with Vitæ you can be comfortable in the knowledge you will enjoy penalty-free transition options should you subsequently need to change and that the full range of Vitæ Consultancy and Support services will be there to help.

Change management engineered in! A simple but powerful concept Simple 'technology refresh' leasing options? ...changing from your own IT to an outsourced service? ...or vice versa? ...migrating thru' IT ownership, to a managed service on your own premises and then to a completely outsourced service? ...or perhaps the reverse process? ...short-term rental migrating into ownership if, say, a tentative business expansion pilot pays off? It's all easy and cost-effective with Vitæ so why climb into a strategic, contractual or financial strait-jacket when Vitæ understands this need for change?

Successful business solutions invariably depend upon the well-managed delivery of both tangibles (e.g. Computer and Network hardware) and intangibles (e.g. software, data processing, consultancy, support, training), with intangibles frequently in the ascendancy. So when selecting business-critical applications such as Vitæ, the quality and range of such services and the strength of the working partnership, must form a vital part of a wise judgement.

Get Vitæ into harness ...fast!

Vitæ's ability to automate many costly and slow day to day processes, coupled with it's configurability, makes it an extraordinarily powerful business toolset. Vitæ doesn't only reduce overhead costs, it seeks to maximise your revenues. The size and rapidity of such gains depend upon Vitæ being quickly and knowledgably deployed, sometimes tricky if Vitæ is new to the business or if work pressures leave normal resources in short supply.

In such circumstances our range of services are there to help you quickly exploit such inbuilt Vitæ strengths as:-

- Process Automation
- Business Alerts
- Automated data capture
- Automated Activity Tracking
- Analytical Reporting
- Mapping/Addressing functions
- Integration with other applications

...thus boosting revenues and profits and speeding your return on investment.
