Please note: The above does not address Virus Protection; System Backup; Fault Tolerance; Disaster Recovery; Security and a variety of other vital considerations for the system planner but our staff will be happy to advise on these issues at any time should the need arise.

The above specifications are for guidance only. Whilst we take every care to keep this document current, new options become available from Hardware, Operating System, Networking, and software suppliers with great frequency so we are unable to accept any responsibility or liability for resulting inaccuracies. Please always check with our staff for the latest tested position before making any firm purchase commitments.
