

## Vitæ V.Temp

The comprehensive Vitæ product family delivers innovative and powerful new ways to streamline your recruitment process and deliver lightning customer response at minimal cost.

Win more bookings! Hold more clients! Lower costs!

Wherever you look, Vitæ delivers fresh system-wide options to the user, system options which underpin the large and ever-increasing family of Vitæ Option Packs.

The powerful yet easy-to-use process automation options; automated data extraction facilities; the advanced and innovative approach to job matching (push or pull); powerful searching without the need for overnight indexing chores; are just a few examples.

Designed-in enterprise scalability, a powerful modern architecture, integrated web functionality and a host of other deliverables come as standard with any Vitæ investment.

Vitæ’s modular construction means that, whilst you need only buy and support the functionality you need, you can confidently add, or mix n’ match, new functionality. As your business evolves and expands, you are reassured that all elements of the Vitæ family will integrate and new modules will get the best from existing data and system configurations.

Vitæ’s V.Temp delivers and supports those functions uniquely relevant to the many aspects the very fast-moving temporary and contract recruitment markets.

From the demanding Healthcare, Medical sectors (where skills, certifications and safety audits become critical considerations), to the lightning-fast and rapidly-varying responses demanded by the industrial and building sectors.

From the highly skills-conscious and carefully-selective contract technical market to the special needs of public service sectors.

Easy to set up, time-saving process automation labour-saving workflows which assist and enhance consultants efforts in what will always remain a people business.

Vitæ’s V.Temp delivers! Fast!

Like all elements of the Vitæ family, the V.Temp user interface closely follows Microsoft standards, making it quick and instinctive to learn and navigate for Windows users.

The (selectable) multi-window Outlook-style workspace with its customisable, dockable toolbars and user-configurable views will all help the new user feel quickly at home.

Familiar cut n'paste and drag n'drop techniques make easy work of otherwise lengthy and tediously repetitive tasks.

Right-click context-sensitive menus and keyboard shortcuts also speed operations (particularly batch keying) in well-understood ways.

Underlying this instinctive interface, Vitæ's powerful and innovative use of modern, industry-standard, enterprise-scalable architecture brings you previously unavailable scope for process automation and user defined workflows to help evolve and increase your business at sustainable costs.
